

Working together to support patients

Fresenius Kabi, a global healthcare company, created the KabiCare Patient Support Program to work closely with you and your patients to simplify their treatment journey and support medication access needs.

KabiCare supports obtaining access for your patients

KabiCare Nutrition Resources

Fresenius Kabi has a portfolio of clinical nutrition products to help your critically and chronically ill patients flourish. The KabiCare Nutrition support program is focused on helping you care for your Parenteral Nutrition patients with a revised and expanded reimbursement support program to help them get the products they need.

Billing and Coding Support

KabiCare offers reimbursement support to help navigate the landscape of Parenteral Nutrition reimbursement. Visit kabicare.us to access an on-line guide for you to read and download.

For help with specific questions or direct educational support, call 1-844-540-5224 (KABI) to speak to a billing and coding support guide or contact us at info@kabicarenutrition.com.

Insurance Support

Providers can visit the kabicare.us site to access reference materials needed for insurance submission such as sample letters of appeals and medical necessity. The KabiCare support team can be engaged to assist with:

Benefit Investigation - If requested, on behalf of the patient, KabiCare Nutrition support can verify the patient's insurance eligibility and all necessary information pertaining to their coverage and communicate it to the healthcare provider office.

Prior Authorization Support - If a prior authorization is required by insurance, KabiCare Nutrition support will review payor-specific requirements and identify the necessary information to successfully process the prior authorization. In conjunction with the provider office, the support team will also coordinate steps required to complete the process.

Claims Appeals Support - If an appeal is appropriate, KabiCare Nutrition support will identify the payor's process and assist with the necessary documentation to facilitate the appeal.

Program Hours: 9 - 5 p.m. EST

About Fresenius Kabi

Fresenius Kabi is a global healthcare company that specializes in life-saving medicines and technologies for infusion, transfusion, clinical nutrition, and specialty pharmaceuticals. Our products and programs are designed to help care for critically and chronically ill patients. For more than a century, we've delivered innovative therapies that are safe, efficient, and affordable. Recognized for our proven track record of quality, reliability, and consistency, we produce our medications in 90 state-of-the-art plants around the world. From essential injectable medicines to advanced systems used to maintain and protect the nation's blood supply. We're committed to making sure that patients have accurate and transparent information as new medication options come to market.
