

Welcome to the KabiCare Patient Support Program. Developed by Fresenius Kabi, a global healthcare company, KabiCare provides financial assistance and support for patients like you who are prescribed medications to treat Hereditary Angioedema (HAE).

KabiCare is here to offer you support and assistance, starting with your diagnosis all the way through treatment and care. You can count on your KabiCare Case Manager to help make sense of your available benefits, the disease state, and your medication as prescribed by your healthcare provider. KabiCare offers a range of programs and resources to help you gain the most benefits from your treatment plan.

- **KabiCare Case Managers** are available to answer your questions and help you understand the insurance approval process. They will also help you access your medication.
- **KabiCare Personalized Nurses** are dedicated to you and your family. KabiCare nurses are available to help you make sense of your disease, treatment and medication as prescribed by your healthcare provider.
- **KabiCare Clinical Team** offers support in a number of ways including: providing disease state education, answering frequently asked questions associated with therapy, and offering in-home injection training.

It is important to note that KabiCare nursing support is not meant to replace discussions with your healthcare provider regarding your care and treatment.

If you have any questions about the program, please **call 1-833-KABICARE (1-833-522-4227)**. KabiCare Case Managers are available to assist you Monday through Friday, 8 a.m. - 6 p.m. EST.

Thank you for your participating in the KabiCare Patient Support Program.

Sincerely,

Tom Tsilipetros
